

GPT-6 Astra · embodied decision trials

9/9 trials completed | measured outcomes, time and API usage

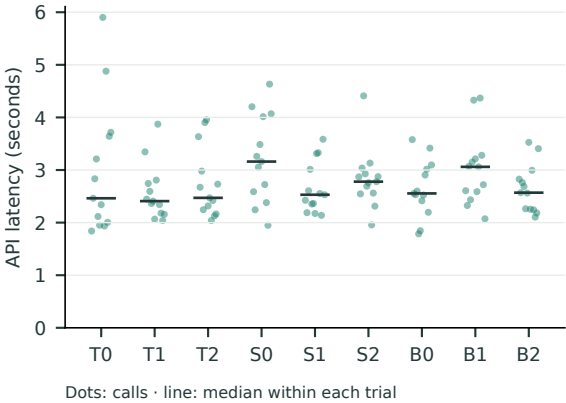

a Task completion

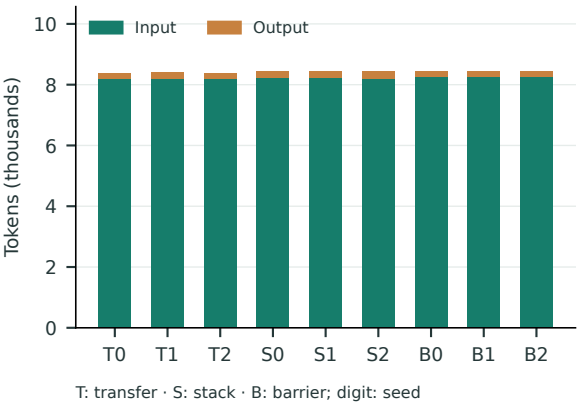

b Elapsed time per trial

c Every recorded API call

d Token usage reported by the API

117 API calls · 74,003 input / 1,818 output tokens. All attempted trials retained.

Known geometry/contact states; bounded action menu. Descriptive development trials, not a general model ranking.
